

Small Swim Group Lesson Protocol

- Parents bring child to pool deck and then use far steps by bathroom on the pool deck to get to the balcony; parents do not wait with child.
- Lifeguard or Deck Supervisor directs child to benches to sit and wait for class (youngest children go to the first set of benches by my Aquatic office window.)
- Parents bring their child's towel and clothes up to the balcony with them. Children keep their masks on until they are about to enter the water. Each child should bring a plastic bag with their name on it, so they can put their mask in the bag and place the bag on the bench during the lesson.
- In the water or on the deck children will be as far away from each other possible.
- After class children put their mask back on and follow guard/instructor to their parents.
- Parents are allowed to come down using the stairs by the bathroom on the pool deck with 5 minutes left in the class, always socially distanced. Supervisor/Lifeguard will help children get to their parents.
- Participants for the next lesson session can come 5 minutes before class but will use the stairs by the Aquatic office to go to balcony as they wait for the lessons before them to end.
- Children come down from balcony using the steps by the Aquatic office with their masks on and go to their assigned bench.
- No piece of equipment may be used by more than one person.
- Instructors will clean all equipment after all the lessons are done.
